

Poster Guidelines

The 11th Prairie Conservation and Endangered Species Conference is once again highlighting the Poster Session as a means for participants to present their research activities while offering an excellent venue for extended informal discussion with colleagues and peers. The following information and guidelines are meant to aid presenters in preparing effective posters.

Poster Presentation Size

Each poster is to be a **maximum of 3.5 ft (42 inches) height x 3.5 ft (42 inches) wide**. There will be two posters to each side of the poster board, so please be neighborly and keep your poster to within these dimensions!

General Appearance

Poster presentations can include pictures, graphs, tables, captions, headlines etc. Posters will be mounted to the panel using push pins (no tape). Presenters are advised to **bring their own supply of push pins** as none will be provided by the conference committee.

Use of color images can greatly enhance the visual quality of a poster. Including a written abstract on a poster is optional, since poster abstracts will appear on the website and in the proceedings.

Lettering

To facilitate easy comprehension and reading of a poster, the following dimensions are suggested: (1) pictures, graphs, charts - at least 20.3cm x 25.4 cm, (2) title and author's name- 28 mm (3) text- 8mm, (4) captions for illustrations - 7 mm, and (5) lettering on graphs/tables 5 mm.

Set-up

Set-up time will be sent out closer to the conference date. Each presenter will be assigned a numbered panel that they will be advised of closer to the conference date.
